About the Firm

Dimensional is a global investment firm that has been serving investors for more than 35 years

Dimensional offers investment solutions across asset classes, including global equities, fixed income, and REITs.

We manage \$582 billion for investors worldwide.

With offices positioned around the world, we manage portfolios across time zones and provide responsive service to our clients.

Dimensional Fund Advisors LP founded in 1981. Global AUM and number of employees as of June 30, 2018. Locations with offices operated by Dimensional. "Dimensional" refers to the Dimensional separate but affiliated entities generally, rather than to one particular entity. These entities are Dimensional Fund Advisors LP, Dimensional Fund Advisors Ltd., DFA Australia Limited, Dimensional Fund Advisors Canada ULC, Dimensional Fund Advisors Pte. Ltd., Dimensional Japan Ltd., and Dimensional Hong Kong Limited. Dimensional Hong Kong Limited is licensed by the Securities and Futures Commission to conduct Type 1 (dealing in securities) regulated activities only and does not provide asset management services.

A Different Approach to Investing

A strong belief in markets frees us to think differently about investing

WHERE DO RETURNS COME FROM?

Dimensional's View

The market drives returns, and portfolio structure and implementation determine performance.

Conventional Manager's View

Performance comes from identifying "mispriced" securities or accurately predicting economic and market conditions.

Index Manager's View

Commercial indices attempt to represent asset class returns, requiring index funds to follow the portfolio construction and rebalancing decisions of the index provider.

At Dimensional, we believe the best way to invest is to identify differences in expected returns and balance the tradeoffs among competing premiums, diversification, and costs.

Our consistent philosophy has guided the investment solutions we have offered clients since our founding.

Putting Research into Practice

Dimensional identifies compelling research and applies it to practical investing

- Many of the greatest advancements in finance have come from the academic community.
- Dimensional works closely with leading financial academics to identify new ideas and research that may benefit investors.

Advancements in research and technology inform our investment strategies and keep us responsive to evolving markets and client needs.

A Clear View of Expected Returns

Decades of research and rigorous testing underpin our approach

Portfolios can be structured around these dimensions, which are sensible, backed by data, and cost-effective to capture in diversified portfolios.

Backed by years of research, we identify and pursue these dimensions for investors.

Diversification does not eliminate the risk of market loss.

1. Relative price as measured by the price-to-book ratio; value stocks are those with lower price-to-book ratios.

2. Profitability is a measure of current profitability, based on information from individual companies' income statements.

A Dynamic Investment Process

Our goal is to add value over benchmarks and peers through a robust process

- Using information in market prices throughout the process, Dimensional carefully structures and implements portfolios to target higher expected returns.
- Our integrated, flexible approach considers the interactions among premiums, market frictions, costs, and diversification.

We want our clients to fully understand our process so they can see how it applies to their goals.

Our Track Record

We have a long history managing time-tested investment strategies for clients

By evolving with advances in financial science, Dimensional has delivered long-term results for investors.

Risks include loss of principal and fluctuating value. Investment value will fluctuate, and shares, when redeemed, may be worth more or less than original cost.

Small and micro cap securities are subject to greater volatility than those in other asset categories.

International and emerging markets investing involves special risks such as currency fluctuation and political instability. Investing in **emerging markets** may accentuate these risks.

Sector-specific investments focus on a specific segment of the market, which can increase investment risks.

Fixed-income securities are subject to increased loss of principal during periods of rising interest rates. Fixed-income investments are subject to various other risks, including changes in credit quality, liquidity, prepayments, call risk, and other factors. **Municipal securities** are subject to the risks of adverse economic and regulatory changes in their issuing states.

Real estate investment risks include changes in real estate values and property taxes, interest rates, cash flow of underlying real estate assets, supply and demand, and the management skill and creditworthiness of the issuer.

Sustainability funds use environmental and social screens that may limit investment opportunities for the fund.
